HTML5 | CSS3 | Bootstrap | Javascript | JQuery | Node.js | npm | Express.js | MySQL | Handlebars.js | REACT | MongoDB | Mongoose

PROJECTS

CineFile | 2021 | **GitHub:** <https://github.com/nidaqq/CineFile>

URL: <https://nidaqq.github.io/CineFile/>

- A browser based application that allows users to search for the movies they want to see and create watchlists from the results.
- A user-friendly, visually appealing multi-page UI paired with semantic code.
- Built as part of a 3 person team
- Technologies used: JavaScript, jQuery, external APIs, CSS

Rubber Duckies | 2021 | **GitHub:** <https://github.com/nidaqq/rubber-duckies>

URL: <https://rubber-duckies.herokuapp.com/>

- A full-stack web application for facilitating communication for those who might experience difficulty communicating due to learning disabilities, social anxiety or the like.
- The App contains two user types and user experiences: the user making use of the app to communicate and the caregiver responsible for them.
- Application build using MySQL and Express backend and a REACT frontend.
- Application build as part of a 4 person team.

CMS Style Blog | 2021 | **GitHub:** <https://github.com/nidaqq/Tech-blog-demo>

URL: <https://lychee-pie-95871.herokuapp.com/>

- A full stack CMS style blog where users can create an account, read other users' posts, create, edit or delete their own posts and leave comments.
- App successfully deployed on Heroku and built from the scratch as an individual project.
- Technologies used: Javascript, Node.js, Express.js, MySql, npm packages, Bootstrap and Handlebars.js templating engine.
